

CLOUD BACKUP

CLOUD DR

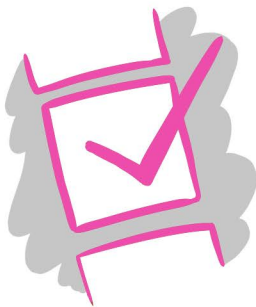

CLOUD COMPLETE

CLOUD DR

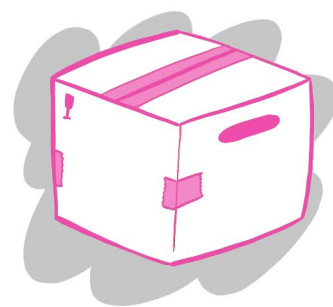

Backup, disaster recovery and business continuity, offered through a strategic partnership with industry leader Datto, as one managed service. Your physical and virtual servers are backup up to a local appliance for fast backups with local recovery, these are then replicated to the Datto cloud to ensure your data is protected in the event of any failure.

Data can be restored locally or straight from the cloud, anything from file level restores, right through to powering up your environment live on our cloud platform, giving you total piece of mind regarding your data. In addition to this, backup data is scanned for ransomware, so in the event of an attack, you can be back up and running within minutes.

- Instant onsite and offsite virtualisation
- Hybrid virtualisation
- Ransomware detection
- End to end encryption
- Screenshot backup verification
- Backup insights

- Physical & virtual platforms
- Broad operating system support
- Time based cloud retention
- Centralised Management
- Faster bare metal restores
- Fully managed backup & DR service
