

PATCH MANAGEMENT

Patch Management effectively manages and updates your essential system software to improve software functionality. The complete service ensures updates are prioritised, tested for compatibility, if necessary, & rolled out with minimal disruptions. Having a patch management process in place reduces the risk of becoming victim of a cyber-attack.

- Ensures installation of necessary security patches
- Fully managed service
- Supports all Microsoft updates (Including non-security updates)
- Free vulnerability checking of systems included

- Effectively demonstrate the adoption of Industry recommended best practice
- Keeps your IT assets up to date with the latest patches
- Reduces the risk of a successful Cyber Attack
- 3rd Line Telephone & Remote Support

Patch Management is part of the Protect product family. Explore the other solutions we offer to manage your IT infrastructure, across our 5 product families.
