

SAFEGUARD

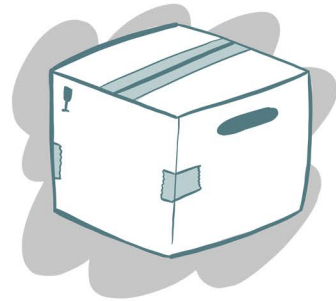

Safeguard is a cloud based Device and Data Security (DDS) product, fully managed by PCS. This solution provides powerful capabilities to see and secure endpoint devices and data stored on insecure laptops or mobile devices.

The product features an easy to use Security Vitals Dashboard that allows you to instantly assess your security posture and take proactive steps to repair endpoint agents and reduce blind spots. With this visibility into crucial device, data, application & user telemetry, you can identify and respond to risks early and prove compliance in the event of a security breach.

- Reporting and Analytics
- Geotechnology
- Risk Assessment
