

WEB PROTECT

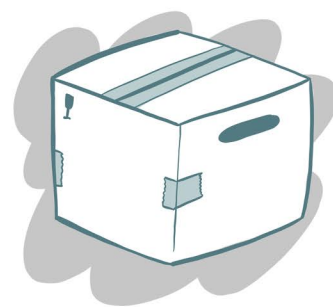

Web Protect provides the ability to block illegal and untrustworthy websites, protecting your business and your users. It also protects against websites that may push harmful programmes including malware, phishing, proxies, spyware, botnets and spam.

Web Protect allows internet browsing rules to be applied so you can ensure that productivity remains high, by implementing time based browsing or scheduled browsing of non-work related websites. All rules can be applied across a department or to a specific individual, enabling you to intelligently filter internet activity.

- Schedule the blocking and unblocking of websites
- Set alerts so bandwidth usage is kept in line with thresholds/policies
- Set individual or group based web viewing policies
- Additional layer of protection from potential internet derived cyber security problems

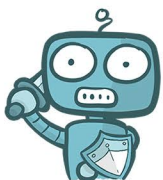

- Increase productivity levels
- Improve network protection
- Prevent liability Issues
- Fully managed by PCS with service desk liaison for your business

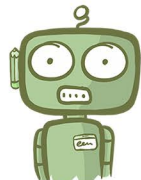

Web Protect is part of the Protect product family.
